

5th Grade Metal Tooling Project

Name: _____

Code: _____

Design

I used a variety of different lines in the design of my relief and in the design of my frame. (Ex. Straight, curvy, angle, thick, thin)

3 2 1

I spent time moving my metal to create high, medium, and low areas.

3 2 1

I used a good mixture of areas with lots of details next to areas with not as much detail to make my design interesting.

3 2 1

I effectively carried over the design of my aluminum onto my frame, remembering what makes a good design.

3 2 1

Color/Shading

I picked a color scheme for my frame. My color scheme is: _____ (warm colors, cool colors, complementary colors, analogous colors)

3 2 1

I neatly applied watercolor to my frame design and used proper watercolor techniques.

3 2 1

I enhanced my background with colored pencils and made each shape/area pop by moving from dark to light.

3 2 1

Craftsmanship/Neatness

My metal is free from blatant tears and my lines are well-defined, crisp and clean.

3 2 1

I carefully outlined my background design with black marker, making sure there are no jagged edges or smudges.

3 2 1

I carefully cut out my 5X5 inch square on the large piece of paper, being sure not to fold my paper.

3 2 1

_____ My shaded areas are neatly done and free from scribbles. It is evident that I took my time.

3 2 1

Total: _____
